

MISSION

Protecting people - protecting profits: For organisations that recognise they are challenged by safety performance improvement, lack sufficient internal resources or need to augment their competencies to meet customer expectations.

VISION

VALUES

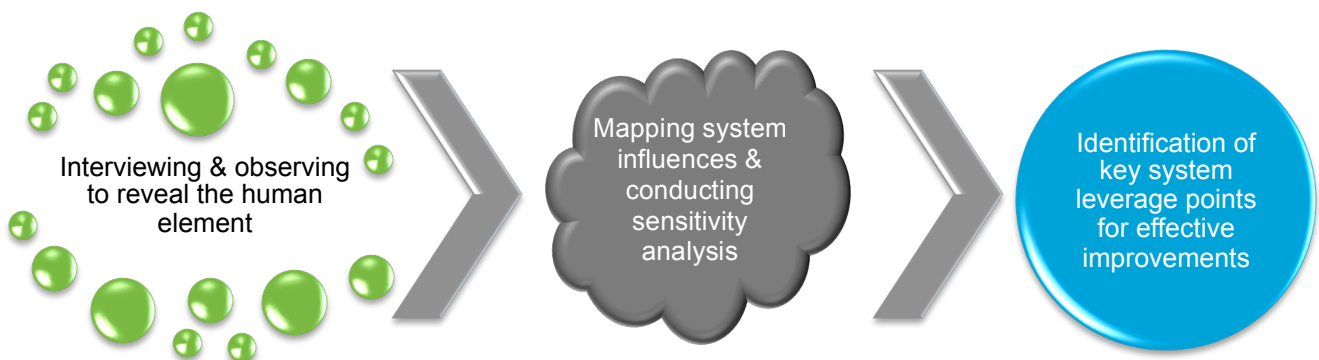

BEST PRACTICE: Safety performance is an integral aspect of modern business activity. Good safety performance comes from good management.

LEGALLY: Health and safety offences are concerned with failures to manage risks and do not require proof that the offence caused any actual harm. The offence is in creating a risk of harm.

FINANCIALLY: Accident and ill-health costs can be likened to an iceberg: costs that are recoverable are visible but those that are unrecoverable are hidden below the waterline and are many times greater.

MORALLY: Health and safety is about ensuring workforce well-being and business continuity.

THE 'CONVERSULTING' REVIEW PROCESS

Stowell Consulting has been actively engaged in the renewable energy sector since 2008. Reference clients include: DNV GL, Siemens Wind Power UK, Adwen Offshore, the Crown Estate, EDF EN, Everoze Partners and Apave SudEurope.
