

CASE STUDY

Location

Morpeth,
Northumberland

Area of operations

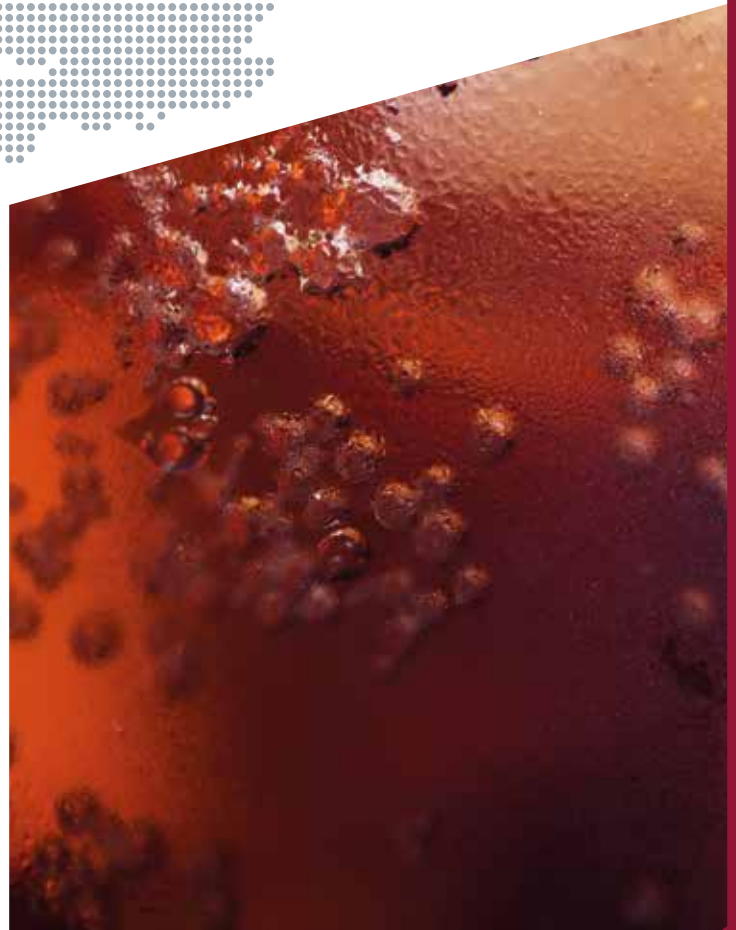

- FMCG
- Geo
- Manufacturing

Pentagon Assurance LTD were asked by CCEP to provide Project, Contract, CDM and site supervision support on a project to drill a 180m deep borehole to increase production capacity and capability of the Smart Water and Abbey Well Brands.

We defined and developed the pre-construction information and the construction phase plan. Our Project manager defined the project timeline, financial targets and NEC contracting forms for all 5 contracted parties.

We were able to add further value to the project in allocating our site supervisor (SSSTS) who also has 15 years experience as a driller to oversee the day to day site drilling activities and safe systems of work, supporting 7000 man hours worked with no lost time incidents.

WHAT OUR CLIENT SAID:

HSE Expertise and Project Management all rolled into one! Pentagon worked on a infrastructure based project at one of our CCEP sites. I was impressed with their ability to manage multiple contractors on site and find resolution to the various challenges thrown up by any large project. Zero safety issues and managed day-to-day tasks effectively. A great asset to any project.
