Testimonials

ECC Corporation

"Outsource Safety has been instrumental in helping ECC continue to enhance its commitment to never compromising safety. The consultant maintains a very positive relationship with both ECC and subcontractor personnel, an important element of the success of our safety program. The consultant's prompt documentation and response to requests for assistance is commendable."

ECC is a multi billion dollar business which works closely with the US Department of Defense across the world. Our knowledge of US DoD Safety Document EM385 ([EM 385-1-1, Safety and Health Requirements Manual](#)) made us the first choice to assist them in the air side and other works completed at US airbases within the UK.

Our work was completing audits and developing the correct documentation for the air side works and also for the internal works in a highly secure area. The environment brought its own specific challenges in terms of how works could be managed but our knowledge of these areas and practical approach ensured a successful partnership which still continues.

If you have List X or other secure sites and require safety support we have the skills and expertise to help, we also hold the correct security clearances and so can react quickly when the needs arises, to find out more please use the contact pages or call us directly on 01453 800100 and ask to speak to Roger Hart.
