About me

I am a Chartered Fellow of the Institution of Occupational Safety and Health (CFIOSH), with over thirty years' experience of advising organisations at both a strategic and operational level, supporting them to fulfil their health and safety responsibilities.

I have a successful track record of working with organisations to continually improve their health and safety compliance and culture, thereby improving employee wellbeing and engagement and reducing the risk of reputational damage, fines and civil claims.

Areas of expertise

- Interim health and safety roles
- Policy development and review
- Compliance and culture improvement programmes
- Compliance audits and investigations
- ISO 45001+ gap analyses

Key qualifications

- ISO 45001+ OHS Management Systems Lead Auditor
- NEBOSH Diploma in Occupational Safety and Health
- FPA Advanced Fire Safety Management

My values

Putting people at the heart of what I do

I take time to understand my clients and work with them to develop systems that work for their business and protects their people from harm.

Integrity and Passion

As a passionate believer in the importance of health and safety at work, I strive to impart that passion, motivating those I work with to do the right thing.

Getting it right

I pride myself in my attention to detail, doing my research and providing quality, accurate advice. I invest in keeping my technical skills up to date and value the importance of continual learning.

Keeping things simple

I see my goal as sifting through the vast amount of complex legislation and guidance and presenting my clients with clear advice and simple, understandable solutions.

MISSION: To provide practical, meaningful solutions that enable business leaders to achieve safer workplaces for their people.
