Principal Contractor

- Hawkins Projects Ltd.

Form of Contract

- 2016 Design & Build

Completion Date.

- November 2019

Value

- £5,500,000

Project Description.

Installation of Industrial grade laundry services providing servicing of 1,400,000 items per annum including high grade sterile equipment and laundry for hospital services.

Installed equipment will provide a semi-automated process line with overhead distribution of laundry baskets to mechanised process line from washing and drying to process and packaging via linear ironing presses, mechanical folding and wrapping facilities.

Installation will also provide office and welfare facilities, transport yard and docking facilities, chemical treatment facilities, full sprinkler provision to all areas.

BWS Innovation & Added Value.

Working closely with the design team and equipment manufacturer we have ensured that the overall requirements of the Workplace Health & Safety Regulations, the CDM regulations, and the Supply of Machinery Safety Regulations have been included and reviewed to provide a safe work place that allows the construction and installation to progress safely, and provides a safe working environment around the mechanised equipment when in full use.

We have ensured that access to all areas of the roof and elevations to the building are fully accessible for cleaning, and that all filters vents and internal surfaces for cleaning, maintenance and replacement of plant can be carried out safely.
