

## Achievement by Arthur Williams (CMIOSH)

Back in 2015 I decided to take a total novice and train him up to be a qualified Occupational Health and Safety Advisor.

He currently works for a local authority over the last 2 years he has achieved great thing by me using my skills and competency to put to the brink of GradIOSH and more longer terms CMIOSH in which I believe he can achieve.

I am giving him the opportunities to put all his knowledge into practice by assisting myself in Risk assessment generic and specific – HS Site Inspections and write up and many many more documentation he will be expected to fill in later in his career.

He his currently seeking an opportunity within an organisation to be an Occupational Health and Safety Advisor I would recommend him to any company whose prepared to give him a chance.
