

LONDON DESIGN FESTIVAL

THE PROJECT

A playful, yet technically ambitious public project to be installed with the powerful backdrop of one of the city's best-loved landmarks, Tate Modern.

CLIENT'S BRIEF

Our fourth year with this very exciting project entered into the realms of CDM given the overall scale of this work. The design team; architect and PC knew what was required and we came in to facilitate all aspects incl. working with the venue to satisfy their high standards, adhering to all CDM requirements, approval of contractors and design stages and management of the installation and sign off inclu. periodical safety checks and site meetings.

THE RESULT

A bespoke project of this scale was delivered on time and surpassed all expectations. Despite the poor run of weather during the build we cracked on and enjoyed the climb to the top.
