Tarmacadam and Lining Contractors

To whom it may concern:

## Re Comply at Work Ltd

We have used Comply at Work as our retained competent advisors for many years and found their services to be excellent.

All queries are responded to swiftly and thoroughly. They have assisted us with Accreditations such as CHAS and Safe Contractor and with the completion of time-consuming pre-qualification questionnaires.

We have also used Comply at Work for the Fire Risk Assessment of our Offices/Unit and for the development of our Health and Safety Policy and Risk Assessments/Method Statements.

Recently, we have engaged their services for a Noise Assessment on site. This was carried out in a comprehensive fashion, with a detailed report to swiftly follow. Since then, they have delivered training on Noise Awareness for all our employees.

We have also used the company for training such as First Aid, Asbestos Awareness and Manual Handling, all of which was carried out professionally and in an engaging way by their experienced personnel.

I would have no hesitation in recommending Comply at Work for Health and Safety Consultancy support.

Mark Darlington
