

Avoid HSE Fees - Contact me for Assistance and Assurance

HSE is committed to carrying out 20,000 proactive inspections per year in industries that intelligence suggests are high risk or priority sectors.

If during an inspection you are found in material breach of the law HSE will charge for the entire visit at a rate of £124 per hour. A chargeable intervention costs a company on average £953, an investigation into an incident would be much higher.

If you operate in the waste sector, in an industry where health risks are high such as food, wood, stonemasonry, fabricated metals and foundries get in touch. There are others. If you want assurance that you are compliant I can provide a snapshot assessment and prevent a hefty bill should HSE find you in breach. Call 07866 263449

Expert Witness

Areas Of Expertise

I can provide independent expert reports and evidence in both criminal and civil courts. My areas of expertise are as follows:

- Practical application of health and safety law, particularly the Health and Safety at Work etc. Act 1974 and subordinate regulations.
- Health and safety management systems. Including the assessment of risk and the development and implementation of safe systems of work, selection of plant and equipment, training and supervision.
- Enforcing Authority procedures and protocols.
- Regulatory audit, inspection and investigation.
- Enforcement action relating to health and safety law.
- Managing dutyholder relationships with regulators.

The Company

DS Risk Management Limited has been trading since February 2015 and is run by David Shorrocks who is a former Principal Inspector of Health and Safety at the Health and Safety Executive.

The company offers regulatory insight into what compliance with UK health and safety law looks like from the perspective of an ex-Inspector. Independent investigation, training, expert witness, audit and assurance are also core services.

Based in the North-West of England, I cover all of the UK and will accept work from abroad also.

Inside Track on Compliance

13 Year experience with HSE has provided with the knowledge to know;

- exactly what you need to do to comply
- how HSE Inspectors should interpret the law
- which industry sectors are being targeted
- whether you should challenge your FFI Invoice
- whether you should appeal your notice
- assist with HSE interventions

PAYG!

No Long Contracts - Pay As You Go

As an ex-Inspector I have seen a vast number of health and safety management systems provided to businesses that are generic, don't reflect the risks that exist within the organisation and manifest themselves as volumes of unused files and folders gathering dust in the MD's office. More importantly they have and continue to cost a small fortune and add no value.

DS Risk Management Ltd will not tie you into expensive contracts ad infinitum. The process is simple. I will visit your organisation and carry out an assessment of compliance and identify any gaps. We will agree how and what resource is required to address any issues raised but more importantly agree the price and the timescales for action.

Sector Coverage

The benefit of having worked for HSE is that I have a broad sector experience. I have experience of the following and many others. Call me if your sector isn't listed. I will most probably have worked in it.

Manufacturing

- Engineering
- Plastics
- Woodworking
- Aerospace
- Paper
