

*3<sup>rd</sup> February 2025*

"I had the distinct pleasure of working alongside Ryan Malone during my time at Lightsource BP on the Grange Solar Farm project in 2020. Ryan served as the Health and Safety Advisor to the subcontractor, and I was consistently impressed by his methodical and common-sense approach to health and safety. He demonstrated a thorough understanding of industry standards and best practices, while also applying practical solutions to address real-world challenges on-site. Ryan's ability to balance safety protocols with operational efficiency, alongside his keen attention to detail, ensured a safe and productive environment for all involved.

Most recently, we had the opportunity to collaborate again on the UK's largest solar farm, Cleve Hill (375MW), where Ryan's professionalism and expertise continued to shine. His pragmatic, solution-focused mindset sets him apart as an exceptional health and safety professional. I would highly recommend Ryan Malone's services to any organisation seeking expert health and safety advice and support within the renewable energy sector."
